

Resignation Letter

July 13, 2023

Dear Membership and Board,

I would like to first thank all of you for your continued support and votes over the years, I and you who elected me had faith in my ability to call votes and get decisions made in a timely manner. I feel that I have tried to consider the majority's wishes in everything I have done. However with the birth of my children, the advancement of my career, and the recent passing of my brother, I can no longer continue to serve this board or this community, even in a minimalistic capacity. I agreed to be a part of this board to try to help Get Things done in a timely manner and make new like minded friends. During the majority of the time I have been on this board I have been involved with several lawsuits and misinformed allegations, yet I stayed present to stay the course. I have been called and physically approached by members now calling themselves the "Garden Club", while as an educator providing education to my own children and others kids from the community and said "I'm teaching" or", "I am lesson planning", just to have them show up in my drive way un - announced to corner and pitch their personal agenda to me when my kids needed food and academic support, I pulled my kids out of organized sports so that I could continue to represent the membership of this community and fulfill my term. I have decided to resign from this board on several occasions and been compelled to stay aboard for the betterment of the board and the community. I have had the opportunity to set with some our founding fathers in this community and some very energetic new residents. This is my third year visiting Celine and Lester in Las Vegas and I bought my house here from Don Niche. Both of whom where pioneers in this community and organization, who recruited me for the board and membership.

I applaud Mats for his perseverance and dedication to this community/ sub-division through his tenure on the board and his consideration of differing opinions, yet willing to keep membership wishes to a vote and act on membership wishes over his own desires! He is an asset, Keep Him!!! (If you can talk him into it).

I have apparently lost a few friends based on fraud , miss quotes, and personal agendas due to my association with this board and those of you who know what I'm talking about, if you want me to talk like the educated retired Marine I am, feel free to approach me, I will make myself available. Some of you court ordered me to provide evidence of my transcripts, diplomas, etc. and at least one of you holds the highest certificate of G.E.D. Stop being fooled!

As for Roy and his Presidency, when I first met him I knew he had a strong personality and it put me off a bit because I also have one. He was exactly what this community needed at that time and the time he has volunteered is unprecedented. He did not necessarily agree with a former employees push to purchase old used equipment to do the road work but went with it since they vouched for the quality. – Roy then spent countless hours bringing said equipment to a serviceable standard, for free. He and Mats have my upmost respect and they have your best interest at heart whether you like them or not! My respect is hard to earn and they have it.

With that, I respectfully resign from the HRRMC of which you elected me to for several terms, due to family responsibilities, lack of time to commit to this Endeavour, and general discorsured with the state of our beautiful community.

Sincerely and Respectfully,

Gabriel L Hechler
